

2v photovoltaic panel

They output a nominal 2V at 150 mA peak via two solderable pads on the back. The panel is constructed with ETFE (Ethylene Tetrafluoroethylene), making it extremely durable and resistant to ...

You can use two or more solar panels with the same parameters in series or in parallel. Series means equal current and added voltage, while parallel means equal voltage and added current.

This small solar panel is a DIY project that provides the joy and satisfaction of building something with your own hands. You can choose to assemble, connect, and install it according to ...

The mini solar panel is made of polycrystalline silicon great for all kinds of low-power electrical appliances, advertising lights, household lights, such as solar water pumps, and small solar systems.

This small, high-quality solar panel is great for demonstrations and student experiments. Attached alligator clips make the panels easy to use.

This 2v solar panel is great for charging your 1.2-volt DC batteries and ideal for use in off grid applications such as smart phones, radio, Bluetooth, wireless sensors, RF Radio Sensitivity or solar ...

The Voltaic 0.3 Watt 2 Volt solar panel is waterproof, UV resistant, and uses high efficiency SunPower solar cells. Peak Output: 2.43V 130mA.

A photovoltaic solar panel with extremely small dimensions, ideal for conducting experiments with solar energy.
