

5G Base Station Network Cabinet 47U

What are 5G outdoor cabinets?

5G outdoor cabinets, also referred to as 5G outdoor cabinets or 5G outdoor enclosures, are boxes designed to house and protect the electrical equipment to support 5G-LTE technology. Made of metals, plastics or a combination of the two material types, 5G outdoor equipment enclosures serve the following primary purposes.

What is a 5G enclosure?

Equipment protection: An enclosure's primary purpose is to protect 5G cables and equipment from damage caused by environmental and physical conditions. The cabinet is mechanically robust and sealed, preventing costly damage from weather conditions, impacts and other factors.

What is a baseband unit (BBU)?

Baseband Unit (BBU): The Signal Processor The BBU is a key element of the base station's architecture. Unlike the large cabinet setups of the past, modern BBUs are compact and resemble distributed devices, similar in size to DVD players. **Function:** Processes baseband signals, which are low-frequency signals in their raw, unmodulated state.

What is a network rack cabinet?

Network cabinets are an ideal storage solution for data centers and telecommunications rooms, specifically engineered to house IT equipment and high density network cables and connectivity. The network rack cabinet provides the flexibility for customers who know exactly what they require of their server rack.
