

Analysis of photovoltaic panel supporting sector

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024.

These statistics showcase the current capabilities of solar technology, from panel efficiency rates and lifespan to emerging innovations in hybrid systems and energy storage, ...

Leverage Your Solar Potential with our North America "US" Utility Solar Services expertise for Reliable in-depth analysis of the nation's largest solar market.

The 2025 Solar Industry Survey was conducted in December of 2024 against a backdrop of shifting political realities and closures of several prominent companies, two years after the solar industry ...

The US solar industry installed 7.5 gigawatts-direct current (GWdc) of capacity in the second quarter of 2025, a 24% decline from Q2 2024 and a 28% decrease compared with Q1 2025.

- The residential PV sector decreased overall growth, contracting 31% due to California's transition to NEM 3.0 and sustained high interest rates across the nation.

The solar photovoltaic (PV) market is segmented by technology, deployment type, end-user, and geography. By technology, the market is segmented into monocrystalline silicon (Mono-Si), ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

In addition to building-integrated systems (on roofs or building facades) and ground-mounted systems, more and more PV systems are being installed on agricultural land (agrivoltaics) and on bodies of ...
