

Ankara urgently needs to install 5G solar container communication stations

The solar power supply system for communication base stations is an innovative solution that utilizes solar photovoltaic power generation technology to provide electricity for communication ...

The study's originality stems from its extensive field research, which aims to provide a more comprehensive evaluation and a fresh perspective on the 5G Valley in Turkey.

In June 2025, Abdulkadir Uraloglu, Turkey's Transport and Infrastructure Minister, announced that the country plans to hold its 5G tender in August and expects the first 5G signals in ...

Abdulkadir Uraloglu said that 5G is not just a faster connection but also the foundation of a smarter, more reliable digital ecosystem. Uraloglu noted that preparations to make 5G available ...

Transport and Infrastructure Minister Abdulkadir Uraloglu announced Sunday that the frequencies to be auctioned for 5G, which features high data speeds, high system capacity and low ...

The 5G service is expected to become operational in 2026, Uraloglu said. The 5G deployment will follow a phased approach, similar to the rollout of 4.5G, the minister added.

Currently, 5G is accessible at stadiums of four major Turkish soccer clubs, IGA Istanbul Airport, and approximately 30 facilities, including the Grand National Assembly in Ankara.

The company's newly developed 4.5G and 5G-compatible base station products are being tested in various locations, preparing more than 3,000 sites for 5G deployment.

Preparations to make 5G available nationwide have reached their final stage, with a tender scheduled for Oct. 16 in Ankara, he said. Türkiye is not only investing in 5G but also laying the ...
