Will Paraguay reshape its energy landscape by 2050?

The Paraguayan government unveiled a transformative energy policy to reshape the country's energy landscape by 2050. Signed into action by President Santiago Peña, this initiative sets the stage for Paraguay to diversify its energy generation and embrace sustainable alternatives such as solar energy, hydrogen fuel, and biofuels.

How to strengthen the energy sector in Paraguay?

1. General energy sector Institutional strengthening: creation of the Ministry of Energy, Hydrocarbons, and Mining (MEHM) by 2024, followed by a plan to strengthen it and the public companies in the sector by 2025. Energy efficiency: creation of the Paraguayan Energy Efficiency Agency (public-private partnership) by 2030.

What is Paraguay's energy policy?

The policy is expected to enhance Paraguay's energy resilience, foster innovation, and contribute to global sustainability goals. Paraguay has long been known for its reliance on renewable energy. Nearly 100% of its electricity is generated from hydropower, mainly through the Itaipu and Yacyretá dams.

What is Paraguay's energy decree?

The decree, officially titled 2.553/24, is a critical step in Paraguay's vision to reduce its dependency on hydrocarbons and align with global energy transition efforts. The government's decision follows a comprehensive review of the nation's energy sector, identifying nearly 300 long-term goals to ensure Paraguay's energy security.
