

Australia Solar Photovoltaic Panel Selection

What are the different types of solar panels in Australia?

In recent years, different types of solar cells have separated premium solar panel brands. Monocrystalline and polycrystalline are the two most popular types of panels in Australia. Both of these panel types have their virtues and choosing one of the other is not as important as selecting a better-quality panel with a long product warranty.

How do I compare solar panels in Australia?

Here at SolarQuotes we've put together a handy, up-to-date comparison tool that lets you compare pricing and technical specifications of products currently available in Australia (updated regularly). If you look at a solar panel specification sheet (aka datasheet), it can often look like a physics textbook, full of numbers and strange symbols.

What makes a solar panel a good choice in Australia?

Premium panels typically fall above 21% efficiency, delivering more power from limited roof space. 2. Temperature Coefficient Panels with lower temperature coefficients perform better in Australia's hot climate. 3. Warranty Coverage The best solar brands offer 25-30 year product and performance warranties. 4. Degradation Rate

What are the top solar brands in Australia?
