

# Battery cabinet above the special transformer

Working space must be allowed in front of the transformer; in practice, additional space may be required by some building codes for passage between the transformer and the wall.

A battery cabinet for a UPS that has an output breaker mounted in it (listed as IT equipment), does not make it a panelboard needing dedicated space. Do you disagree?

Alpine Power Systems engineers and builds customized battery cabinets and enclosures for critical power applications, for utility, telecom, CATV, data center and other applications.
