

Botswana's vast solar potential positions the country as a key player in the regional clean energy transition. By prioritizing solar energy, the government aims to diversify power generation, ...

Botswana is making significant strides in its commitment to transition from fossil fuels to a sustainable energy mix, as highlighted by the new 100MW Solar PV Plant to be constructed in Jwaneng.

This National Energy Policy (NEP) is intended to guide the management and development of Botswana's energy sector, especially the penetration of new and renewable energy sources into the ...

To support small-scale solar initiatives, the government said it continued to implement its rooftop solar programme for domestic, commercial, and industrial consumers, with an installed ...

Develop a national gender and energy policy and strategy that addresses women's energy access needs, supports the deployment of productive use technology in phases, and promotes women's ...

Botswana has a significant solar potential receiving over 3,200 hours of sunshine per year with an average insolation on a flat surface of 21 MJ/m. This rate of irradiation is among the highest in the ...

These Guidelines define the framework and administrative process for the implementation of small scale grid-tied solar photovoltaic (PV) systems, either roof or ground mounted. The system-wide aggregate ...

Botswana's rolling out its most ambitious energy storage initiative yet - but what does this mean for solar adopters and businesses? Let's unpack how the 2025 subsidy policy could reshape renewable ...

Projects focus on solar and wind energy, infrastructure upgrades, and rural electrification. Energy costs are expected to drop by 30%, reducing reliance on fossil fuels. The initiative supports ...

The energy division of the Botswana Institute for Technology Research and Innovation (BITRI) focuses on the development and adoption of clean energy technologies such as solar-powered solutions and ...
