The Energy Commission's Solar Equipment Lists include equipment that meets established national safety and performance standards. These lists provide information and data that ...

Transparent solar windows that capture ultraviolet and infrared light are now available in the US, enabling buildings to generate clean energy while maintaining aesthetic appeal.

N Data for this geographic area cannot be displayed because the number of sample cases is too small.

The Tskhinvali photovoltaic energy storage system, nestled in the Caucasus region, represents a cutting-edge integration of solar power generation and lithium-ion battery technology.

Summary: Explore how Tskhinvali's industrial and commercial energy storage systems optimize energy costs, enhance grid resilience, and support renewable integration. Discover real-world applications, ...

Solar power is reassuring for California communities. In 2019, 25,281 blackout events, representing a 23 percent jump from 2018, occurred in California and affected 28.4 million customers.

CA.gov is the official website for the State of California. You can find and access California services, resources, and more.

The Supreme Court has allowed California to use a new voter-approved congressional map that is favorable to Democrats in this year's elections, rejecting a plea from state Republicans and ...

OverviewPhotovoltaicsHistorySolar thermal powerGenerationGovernment supportState challenges with solar powerPublic opinionIn 2011, California's goal to install 3,000 MW of distributed generation by 2016 was expanded to 12,000 MW by 2020. California has more photovoltaics installed than any other federal state, and 48% of the U.S. total in 2010. For the first time in 2008 the installed photovoltaics exceeded the state's 354 MW of solar thermal (CSP). There are plans to build over 15,000 MW of utility scale p...

The California Energy Commission licenses solar thermal plants above 50 megawatts and promotes solar photovoltaic installation through the Renewables Portfolio Standard, with building efficiency ...

California (/ ?k&#230;II'f?:rni? /) is a state in the Western United States that lies on the Pacific Coast. It borders Oregon to the north, Nevada and Arizona to the east, and shares an international border ...

California has over 49,000 MW of installed capacity and solar supplies more than 31 percent of California's electricity today, but it must play a bigger role if the state is to reach climate and energy ...
