

This study aims to determine the most suitable location for a solar power plant in Türkiye by employing an integrated multi-criteria decision-making (MCDM) approach.

The project will develop a 100-megawatt solar power plant in Hatay Province, Türkiye, awarded in June 2022 under the government's Renewable Energy Resource Zone (YEKA) program, ...

In 2024, 99 percent of Türkiye's 8.7 GW capacity addition came from renewable energy sources. With this growth, renewable energy capacity reached 57 percent of Türkiye's total installed capacity. The ...

AIIB and TSKB finance a 100-MW solar power project in Hatay, Türkiye, advancing clean energy, sustainability, and regional recovery.

This study examines the recent development of solar and wind energy capacities in Türkiye in the context of current renewable energy targets and strategies.

Over the past decade, Türkiye has more than tripled its renewable energy production, has announced an ambitious objective of adding an additional 60GW of wind and solar by 2035, ...

Türkiye ratified the Paris Agreement in 2021 and declared its intention to achieve the "net zero" target by 2053. The government announced a target of an increase of 1 gigawatt in solar photovoltaic and ...

The Asian Infrastructure Investment Bank (AIIB) and the Industrial Development Bank of Türkiye (TSKB) have recently agreed on terms to finance a 100 MW solar PV plant to support ...

Türkiye's Energy and Natural Resources Ministry has awarded 650 megawatts (MW) of new solar capacity under the country's Renewable Energy Resource Zones (YEKA) program, in a ...

Developed in line with Kalyon Energy's sustainable energy vision, the G24 Karapınar Solar Power Plant is set to become one of Türkiye's largest renewable energy projects.

Clean solar energy for power plants in TÅ¼rkiye
