

Community Microgrid Project

What is the community microgrid initiative?

The Community Microgrid Initiative is designed to achieve Community Microgrid demonstration projects that prove that local renewables connected to the distribution grid can provide at least 25% of the total electric energy consumed while maintaining grid reliability and power quality.

Can Community Microgrids deliver equitable energy resilience in frontline and marginalized communities?

Managed by a local non-profit, the microgrid can keep power on for 14 local businesses and community services in the town's center during times of crisis. These initiatives are not alone in modeling the potential for community microgrids to deliver equitable energy resilience in frontline and marginalized communities.

How can we help communities build and operate microgrids?

Using our technical, regulatory and policy expertise on community energy systems, we can assist these communities to build and operate microgrids. This website provides vital information on microgrid planning, design, and other relevant aspects (business models, policy and regulatory aspects).

What is an example of a community microgrid?

For example, a community microgrid in a rural area may have different objectives than a community in an urban setting [12,20]. The rural community may prioritise energy independence and self-sufficiency, while the urban community may focus on reducing greenhouse gas emissions or increasing access to affordable energy.

Here you will find news and feature articles about community microgrids. Central to today's local energy revolution, a community microgrid is a mini-version of the larger grid, but it is ...
