

Constant Temperature and Humidity Cabinets along the Belt and Road Initiative

A constant climate chamber features an interior (usable space) in which the required climate conditions (temperature and relative humidity) are generated and maintained over a predefined period of time.

This state of the art cabinet is designed to provide a stable and controlled environment, with temperature and humidity controls that can be quickly and accurately adjusted as needed.

Whether your testing is for R& D, shelf life, accelerated aging or steady-state testing, our constant climate chambers provide a stable, temperature/humidity conditioned environment for worry-free ...

The science behind these chambers is based on advanced principles of thermodynamics and moisture regulation, working together to create an environment where temperature and humidity are finely ...

By evaluating the impact of climate-induced risks on 217 Belt and Road Initiative (BRI) projects, we focused on the escalation of heat stress affecting human work capacity and the potential ...

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

At Kardex, we recognize the critical challenges of managing temperature-sensitive goods. With extensive experience in the pharmaceutical, chemicals, and electronics industries, we provide ...

64 temperature will continue its upward trajectory, rising by 1.5-2 °C; even minor temperature 65 increases would escalate regionally and change the precipitation pattern.

Our climate controlled storage cabinets deliver stable temperature and humidity, so rubber, polymer, and composite materials age slower, inspections pass more often, and field crews stay ready.

Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.
