

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

This article explores how cutting-edge battery storage technology is reshaping the country's power grid while creating opportunities for international collaboration in clean energy infrastructure.

As a well-connected part of Southeast Europe's power system, with extensive interconnectors, Croatia now faces the central challenge of integrating battery storage into the grid ...

In November 2020, we contracted the development of the 1 MW battery storage system (BSS) that can store 1.44 MW of electricity. This turnkey project encompassed the final and detailed design, ...

If you are exploring solar battery prices in Croatia and want a solution that balances safety, longevity, and value, Seplos offers reliable home energy storage systems that deliver lasting performance and ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time balancing of ...

In 2022, a contract was signed to deliver battery electric multiple unit (BEMU) prototype and battery multiple unit prototype (BMU) with 6 energy storage devices.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

Croatia solar container battery Group
