

# Electric grid barbados

Does Barbados have a sustainable electricity supply?

The country has significantly reduced its reliance on imported fossil fuels and increased its renewable energy capacity. While power outages and voltage fluctuations still occur, Barbados now has one of the region's most reliable and sustainable electricity supply networks.

Why are electricity prices so high in Barbados?

The high cost of imported fuels and the limited availability of domestic energy resources mean that electricity prices in Barbados are relatively high compared to other countries in the region. This can be a burden for low-income households and businesses and may limit the uptake of renewable energy technologies.

Does Barbados have solar power?

The SEFB has successfully attracted investment in renewable energy projects, such as solar and wind power installations. As of 2021, Barbados has installed over 30 megawatts (MW) of solar photovoltaic (PV) capacity, which is equivalent to approximately 11% of the country's total electricity demand.

How many power plants are in Barbados?

Barbados has 27 power plants totalling 1.00 MW and 264 m of power lines mapped on OpenStreetMap. If multiple sources are listed for a power plant, only the first source is used in this breakdown. Statistics on the electricity network in Barbados from OpenStreetMap.
