

Is 2025 a good year for energy storage installations?

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings and relentless technological advancements to shifting policy headwinds and tailwinds, 2025 proved to be anything but uneventful.

Is energy storage on track for a record year in 2025?

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that developers will add 94 gigawatts (247 gigawatt-hours) of battery capacity this year, a 35% increase over 2024 and the highest annual total to date (excluding pumped hydro).

What is the future of battery energy storage?

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant installation growth and technological advancements.

Will energy storage capacity reach 2 terawatts in 2035?

BloombergNEF expects cumulative energy storage capacity in 2035 to reach 2 terawatts (7.3 terawatt-hours) - eight times the level in 2025. Utility-scale projects continue to dominate applications. See 2H 2025 Energy Storage Market Outlook for more details.

This report analyses the supply chain of the global energy storage industry, focusing on China, Europe and the United States. The report highlights key trends for battery energy storage ...

The global energy storage sector is on track for another record year in 2025 as utility-scale projects expand into new regions. BloombergNEF (BNEF) forecasts that developers will add 94 ...

According to InfoLink's Global Energy Storage Supply Chain Database, global energy storage cell shipments totaled 410.45 GWh in Q1-Q3 2025, up 98.5% YoY. In Q3, resonating ...

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil. Annual ...

Tesla hits record 46.7 GWh battery storage deployment in 2025 with 49% growth, boosting energy division profits.

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant installation growth and technological advancements. A ...

Solid-State Batteries on the Horizon Solid-state batteries, utilizing solid electrolytes instead of liquid ones, are gaining attention for their enhanced safety and higher energy densities. While ...

Energy storage battery distribution in 2025

If 2024 was the year energy storage went mainstream, 2025 is when it's hitting the gym and bulking up. Global energy storage battery shipments are projected to reach 392 GWh in 2025, ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From price swings ...

Explore the future of energy storage systems and the top battery technology trends for 2025 shaping sustainability, efficiency, and power resilience.
