

The targeted implementation of battery energy storage systems can ease the burden on the network, enhance supply security, and enable better utilization and sustainable integration of ...

As Europe accelerates its renewable energy transition, the Zagreb lithium battery energy storage project emerges as a groundbreaking solution for Croatia's power grid stability. This article explores how ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank ...

Croatia is taking a major leap forward in its green energy transition, backed by a significant investment from the European Bank for Reconstruction and Development (EBRD) and ...

Renewable Energy Sources of Croatia (OIEH) and the European Bank for Reconstruction and Development (EBRD) have launched the development of an expert study titled "Identifying Grid ...

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

The Croatian government has allocated almost EUR20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage ...

Croatia's distribution system operator, HEP ODS, now considers the regulatory framework for battery storage sufficiently robust. Three connection models are available, though key ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Energy storage battery production in Croatia
