

Financing for mobile pv distribution bridge projects

How does a solar project finance deal work?

For typical solar project finance deals involving debt and tax equity, the construction loan is sized to be repaid from some combination of the permanent term loan and the tax equity investment.

Are solar projects financed with debt?

Though the prevalence of debt financing has perhaps been overshadowed in the solar industry by its cousin tax equity (more on that below), most solar projects are financed at some point in their life cycle with some manner of debt.

What is a transfer bridge loan (trabl)?

In this episode of Latham in Focus, partner Kelly Cataldo explains how transfer bridge loan (TRABL) facilities can bridge capital needs during construction and before payment for tax credits, as well as certain emerging terms as the market develops. A new type of bridge loan is available for renewable energy projects.

Who participates in the financing of solar projects?

Developers, independent power producers, solar panel manufacturers, engineering, procurement, and construction ("EPC") contractors, utility companies, financial investors and, more recently, commercial and industrial end-users all participate in the financing of solar projects in different manners and at different times.
