

Hanergy solar panels supporting

We adhere to the highest standards to construct, maintain and operate the solar equipment in a safe, professional way to deliver a reliable solution and to maximize the solar energy from the system.

In the field of solar energy, Hanergy has invested in the construction of thin-film solar industry R& D and manufacturing bases in Sichuan, Guangdong, Hainan, Zhejiang, Shandong, Jiangsu and other ...

Hanergy manufactures high efficiency thin film solar modules. Almost 95% of the production materials are manufactured internally and supplied for solar module manufacture.

With efficiency of greater than 15%, the panel exceeds silicon performance with low temperature coefficient. In addition, the panel is designed with low system cost in mind.

Unlike conventional panels, Hanergy's thin-film technology demands special handling. Their lightweight design (up to 30% lighter than silicon panels) allows unique mounting solutions but requires specific ...

The new Hantile combines Hanergy's world-leading flexible thin-film solar panels with high-transmittance glass to create an innovative product capable of high-efficiency power generation that...

Hanergy, a prominent player in the renewable energy sector, has emerged as a significant force in China's transition towards sustainable energy solutions. This guide delves into the ...

These unique qualities make it adaptable to a wide range of applications, including Building Integrated Photovoltaics (BIPV), residential power, agricultural applications, automobile power, electronics, ...

The panels are the highest efficiency, flexible, thin-film product on the market today, with >17% cell efficiency. The FLEX Series module bonds to surfaces with a simple peel-and-stick adhesive.
