

Hikvision solar panel bracket installation

Does Hikvision offer a solar-powered security system?

Hikvision also provides separate solar power kits that allow customers to combine them flexibly with their choices of security cameras. Unlike most solar-powered security solutions on the market, which often consist solely of hardware devices, Hikvision stands out by offering a comprehensive package of hardware and software.

Does Hikvision offer a do-it-yourself camera system?

Hikvision provides user-friendly do-it-yourself (DIY) solutions with solar power kits designed to power cameras. Customers can choose 4G or Wi-Fi for wireless data transmission from the integrated camera. Hikvision's solar-powered camera systems and solar power kits provide customers with eco-friendly, sustainable 24/7 security solutions.

What types of solar-powered camera setups does Hikvision offer?

Hikvision offers a wide variety of solar-powered camera setups designed to meet different needs and applications. Our solar-powered offerings include bullet camera setups, ANPR camera setups, PT camera setups, and PTZ camera setups.

How do I add a camera to HIK-Connect platform access?

On the web page of the camera, select Hik-Connect Platform Access and then Enable. Click Next to add the device, input the verification code (consistent with the verification code set on camera's web page), select device type: Camera (Wireless) - Solar Camera. If the indicator flashes blue slowly, click Next to complete adding.
