

# How about home solar panels

Do solar panels produce more energy than a home needs?

Solar panels can produce more energy than your home needs. In that case, the extra solar energy can be sent back to the utility grid or stored in a battery system for later use. There are three main types of solar power systems: grid-tied, hybrid, and off-grid systems, which we explain in the videos below.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens - sometimes hundreds - of thousands in savings over the warranty period of the panels.

Should I get solar panels for my home?

Today, going solar is a routine home improvement project that comes with the benefits of energy cost savings, reduced emissions, and increased home value. In this article, we'll cover everything you should know about getting solar panels for your home so you can make informed decisions as you navigate the process.

Topics in this article:
