

IKEA invests in solar power plant

Ingka Group has made robust investments in solar energy, acquiring numerous solar PV park projects across Germany and Spain. These projects are forecasted to supply electricity for ...

When the company started working on renewable energy, it made the most sense to own renewable energy directly, and Ikea stores are now plastered with more than 900,000 solar panels. It ...

Solar energy also plays a significant role in IKEA's renewable energy production, with 80% of IKEA stores already equipped with solar panels. These panels produce 20% of IKEA's energy ...

We develop, construct, acquire and operate utility-scale wind, solar and storage projects and sell renewable energy to reduce the climate footprint of Ingka Group and the IKEA value chain.

IKEA's largest retailer, Ingka Group, has announced an additional EUR1.5bn investment to accelerate its transition to IKEA renewable energy solutions and eliminate reliance on fossil fuels in ...

In 2021, we launched a programme to enable all supply partners to consume 100% renewable electricity. Initially the programme was introduced for our direct suppliers in Poland, China and India.

With 49 wind farms and 26 solar parks generating enough low-carbon electricity to power approximately 1.47 million EU households, Ikea's commitment goes beyond just selling furniture; it ...

Ingka Investments, the investment arm of Ingka Group -- the largest IKEA retailer globally -- has acquired a 100 percent stake in a 210 MWp subsidy-free solar project in Bikaner, marking its ...

Sustainability investments include material innovation, electrification of transport, and renewable energy expansion. IKEA increased the share of renewable electricity in production to 75% ...

IKEA U.S. announces commitment to clean energy with new solar installation and large-scale renewable heating and cooling projects
