

# Jinko double-sided 580w photovoltaic panel

Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Module power increases 5-25% generally, bringing significantly lower LCOE and higher IRR. The N ...

The Tiger Neo Series panels are designed with a half-cell architecture, which improves module reliability and reduces power loss. By dividing the cells into two halves, the resistance in each cell is reduced, ...

Bifacial solar cell technology for enhanced efficiency. Produces 580W per square feet to optimize rooftops with space constraints. Independently generates renewable energy for electric bill savings. ...

This solar panel is designed for easy installation with standard dimensions and weight that facilitate flexible mounting options. Its robust construction ensures stability and durability, making it suitable for ...

This solar panel is designed for easy installation with standard dimensions and ...

Upgrade your energy solution with the Jinko JKM580N-72HL4-BDV 580W bifacial solar panel. Designed for optimal efficiency with 144 N-type half-cells, this module maximizes energy generation while its ...

With its bifacial design, the panel captures additional sunlight on the back side, ...

Upgrade to Jinko 580/590/600 Watt half cut bifacial solar panels with advanced N-Type TOPCon tech for maximum output and long-term savings.

JKM580N-72HL4-BDV has solar cells half the size of those installed in conventional panels. The main benefits are decreased power loss, improved longevity, and better low-light performance. At 22.45% ...

With its bifacial design, the panel captures additional sunlight on the back side, significantly improving energy harvest in high-reflectivity environments. This panel is built with premium dual-glass and a ...

The JKM580N-72HL4-BDV Bifacial EAGLE® G6B modules utilize Jinko's latest flagship TOPCon cell technology, featuring record breaking cell efficiencies of over 26%.

Jinko Solar Tiger Neo 72HL4-BDV is a high-performance bifacial solar panel that utilizes double glass technology to achieve an ultra-high power output of up to 580W.
