

Ljubljana electric vehicle costs

How much does it cost to charge an electric car in Europe?

• A full charge in Europe costs 5% of net weekly income (on average), with Albanians having to part with 12.9% of their weekly income to charge their EV, in contrast to Icelanders who only spend 1.3% of their weekly pay to power their cars. Top 10 most expensive countries to charge an electric car in Europe

Are electric cars affordable in Europe?

In other European countries, the affordability of electric cars saw little change. In the United Kingdom, for instance, the average price premium of battery electric SUVs made only slim progress, dropping to 30% in 2024 from 40% in 2021.

Will small cars become cheaper than petrol cars in Slovenia?

In Slovenia, without upfront subsidies (Ecofund), small and medium cars will not become cheaper than Petrol ICEs until 2027 and 2025 respectively. However, with access to a EUR4,500 Ecofund, medium cars would already be cheaper today than equivalent Petrol ICEs for first owners on a TCO basis.

How much does a BEV cost in Slovenia?

Medium BEVs, based on EU averages and excluding taxes & subsidies, are on average around EUR1,100 more expensive than Petrol ICEs. In Slovenia, BEVs are ca. 4% more expensive than EU averages, increasing the relative TCO costs for first owners by around EUR1,100.
