

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025.

This section outlines key EU projects, initiatives, and market trends in energy storage, highlighting efforts to integrate renewables, enhance grid stability, and support the clean energy transition.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into regional grids, evolving ...

Solarpro, a leading technological provider of solutions for the generation and storage of energy in Europe, has successfully deployed the largest battery energy storage system (BESS) project in Eastern ...

Block Energy plc has successfully completed the first CO<sub>2</sub> mineralization pilot project in Eastern Europe, marking a major step forward for carbon capture and storage (CCS) technologies in the region.

Blackvolt Energy is building Austria's leading battery energy storage platform. We are focused on the development, financing, construction, and long-term operation of utility-scale BESS projects that enable a ...

Subscribe to our technical newsletter for the latest innovations in photovoltaic power generation, solar energy systems, lithium battery storage, photovoltaic containers, BESS systems, PV inverters, storage batteries, ...

Trina Storage, the energy storage subsidiary of Trinasolar, has signed a new battery energy storage system (BESS) project in Romania with leading EPC contractor Allview, marking its first foray into ...

The new energy storage projects in Poland and Romania, utilizing Hithium's advanced LFP cells, represent significant progress in energy storage in Eastern Europe.

StarCharge is advancing its European expansion with the signing of a 500-MWh order for its energy storage system (ESS) technology with US renewable energy investor Energy Investment LLC for ...
