

New hydrogen energy photovoltaic site in South Africa

Hive has established some of the world's leading solar PV projects, including the UK's largest solar park at Cleve Hill in Kent (370MW), and is leading the development of one of the world's ...

As the Africa Green Hydrogen Summit kicks off in Cape Town from 12 to 13 June 2025, Hive Hydrogen South Africa announced that it has completed its 1430MW Solar PV Cluster ...

The JER South Africa Hydrogen Solar PV Project is a 12,000MW Solar PV power project located in Northern Cape, South Africa. It is being developed by Jerrard Energy Resources.

On the South African side, this hub builds on the early days of the Hydrogen South Africa (HySA) program, which kicked off back in 2008. Today, you'll find advanced fuel cell technology ...

One of the world's largest privately initiated renewable energy projects is being built in the Northern Cape - a place where sun and wind become green molecules and South Africa paves the way to a ...

Following go-ahead for the required renewable-energy generation, South Africa's R105-billion Coega Green Ammonia project in Nelson Mandela Bay has now advanced to front-end ...

Coega Green Ammonia project reaches milestone with 1 430 MW solar PV cluster development, set to produce over 1 million tons of green hydrogen-derived green ammonia annually.

Hive Hydrogen South Africa's Coega Green Ammonia project has received permission for the development of a 1,430 MW solar PV cluster to supply 40% of its power ...

Crossroads Green Energy 1430MW Solar PV Cluster now fully permitted. Construction planned to commence in Q4 2026. The Solar PV project will supply power to Coega Green Ammonia ...
