

# North Macedonia's new solar inverter

Luxembourg-based Zen Energy Group has started the installation of a hybrid energy project in North Macedonia, combining a solar power plant and a battery energy storage system.

While hydropower traditionally dominated North Macedonia's renewable sector, PV systems have led the expansion between 2022 and 2024, marking an unprecedented growth period ...

A new energy law adopted in May 2025 is expected to further accelerate the uptake of battery storage. State-led solar and wind projects, along with investments in grid infrastructure and ...

The first large-scale PV facility in North Macedonia is now under development and nearing completion. The Oslomej solar plant, funded by the EBRD, was erected in Kichevo and features eight 1400 kW ...

EcoSync has successfully launched a 20MW solar project in Macedonia using 550W bifacial modules, paving the way for clean and sustainable energy solutions in the region.

This entire process of solar power conversion eliminates carbon and greenhouse gases, providing an ecologically friendly solution for a brighter and healthier future. Schneider Electric aims to develop a ...

Introducing our latest #solar project in North #Macedonia! ? This 11MWp project consists of three power plants using Kehua SPI250K-B-H series #inverters, a state-of-the-art #PV solution...

This report, "North Macedonia Renewable Energy Market - 2025 Update", has been produced by Invest In Network as part of the Energy Week Western Balkans 2025 framework.

North Macedonia's transition to renewable energy, particularly solar power, is poised for significant growth in the coming years. The government has set ambitious targets to achieve a net ...

The Oslomej solar project, financed by the European Bank for Reconstruction and Development (EBRD), has been built alongside a coal-fired power plant located in Kichevo and is ...
