

Oman shopping mall uses 250kW solar-powered container

What is the solar power potential in Oman?

Oman receives a tremendous amount of solar radiation throughout the year, which is among the highest in the world. There is significant scope for harnessing and developing solar energy resources throughout the Sultanate.

Is investing in solar energy profitable in Oman?

Solar energy in Oman is expected to become progressively cheaper in the near future and could offer a good return for investments. The success of solar energy in Oman is merely determined by the government's regulatory policies, fiscal incentives, and public financing.

Can Oman's power sector regulate rooftop solar panels?

The Authority for Electricity Regulation Oman (AER) - Oman's power sector regulator, is taking steps to pave the way for homeowners to install rooftop solar panels. Any surplus electricity generated can be sent back into the national grid.

Which region in Oman has the highest solar radiation?

The highest solar radiation in Oman is found in Marmul. Other regions with high solar radiation include Fahud, Sohar, and Qairoon Hairiti. The desert areas in Oman generally have the highest insolation of solar energy, while the coastal areas have the least.
