

Photovoltaic panel cell lead string welding machine

Solar cell welding machine OCH1500 can be integrated with automatic layout machine to achieve the composing and locating of solar cell strings on tempered glass.

String welder is the equipment that connects the cells in series to obtain high voltage, and it is also the equipment with the highest technology and value in the PV module ...

It is an automated production equipment capable of string welding PV crystalline silicon solar cells, characterized by high production capacity, high precision, and high compatibility.

Machine Function Tabber Stringer Machine is used to weld solar cells to strings; Solar cell stringer machine OCH1500 adopts IR soldering method, servo motor driving and industrial CCD ...

Not only is the process very fast but also of excellent quality, thanks to the hybrid technology with hot air welding designed by Ecoprogetti Srl. The process is programmed on a touch ...

Solar cell stringer machines are efficient and automatic soldering equipment for serial connection of solar cells into strings. The machine applies infrared soldering and automatic cutting to different solar ...

The most critical figure in the entire production line -- tabber and stringer machines attaches and solders ribbons on the photovoltaic cells IBC, MBB, and various busbars, ensuring that the cells are ...

With the popularization of BC cell technology, high-efficiency string welding equipment will provide stronger assistance for the industry to reduce costs and increase efficiency.

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the ...

One of the most critical machines in the Solar/PV production line is Stringer attaches and solders ribbons on the photovoltaic cells IBC, MBB, and various busbars, ensuring that the cells are aligned ...

Photovoltaic panel cell lead string welding machine
