

Photovoltaic panel placement platform

Integrate local weather data to optimize panel placement and energy production. Plan your installation timeline with our smart scheduling tool. Track your system's performance in real-time with intuitive ...

OpenSolar connects homeowners, solar professionals, and partners with free software to design, sell, and manage fast, accurate solar projects.

Solar Planner PV-Mapp takes field coordinates and returns complete solar panel placement layouts, export files and quote-ready reports for mounting systems - instantly.

Solar design software is a specialized tool that enables professionals and enthusiasts to design solar energy systems efficiently. It helps in the accurate placement and configuration of solar panels, ...

Streamline your designs with an easy-to-use interface that seamlessly integrates a single design across multiple platforms like Autocad, PVsyst, and the SolarEdge Monitoring Platform. Eliminate design ...

Solar design software is specialized design software that enables solar companies to accurately plan and optimize photovoltaic (PV) systems for homeowners and commercial clients.

Design solar panel arrays faster with suggested placements that cover the sunniest parts of the roof first. Get an hourly breakdown of sunlight and shade on a roof, based on year-round...

Use a free tool from Google Maps Platform to plan solar panel installation yourself or with a solar professional based on your home's available space.

Design accurate residential and commercial solar layouts with auto panel placement and shading analysis. Built for EPCs and solar installers.
