

Photovoltaic panel throwing

One of the main reasons behind the damage caused to solar panels is throwing/falling hard objects like a stone on their surface. Not only this but, if a tree or its branches falls on panels, it will also cause ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...

Your solar panels work hard to power your home, but electrical issues can throw a wrench in the system if you're not careful. A power surge or lightning strike can fry your inverter, ...

We fitted plexiglass "riot shields" over the panels on one "community" installation after one or two panels got smashed. They were suspended clear of the panels by about an inch.

With the increase in solar panel installations, there's a growing concern about how to dispose of these panels at the end of their life cycle, as they contain potentially harmful materials such as lead and ...

Solar panels can shrink your carbon footprint and your energy bill, but they can be fragile. Here are some ways help them achieve a long, productive life.

Scratches, cracks, and other destruction caused by stones can decrease solar panel efficiency or even render them unusable. Therefore, it is essential to implement protective measures to maximize ...

Discover our guide on how to protect solar panels from stones. Follow these practical steps to ensure the maximum safety of your solar panels.

Even under the worst of worst-case scenarios, throwing damaged, crushed or otherwise decommissioned photovoltaic (PV) solar panels into unsafe, unsanitary landfills will ...

What to Do If You Are Willing to Install the Solar Panel and Thinking of Protection from Stones or Hail? If you're in the planning stages of installing solar panels and are worried about ...
