

The photovoltaic (PV) film resin material market presents significant entry barriers for new players, driven by technological complexity, capital intensity, and stringent certification ...

Known for its toughness and adhesion, PVB is widely used in safety glass (like car windshields). In solar panels, it offers good protection and structural integrity. Its application often ...

Epic Resins offers a complete range of bonding, potting and encapsulating products for solar energy applications. Epic Resins products are designed for optimal thermal management critical in solar ...

Whether it's for use with standard, fast or ultra-fast cure encapsulants and laminating processes, Flexcon MultiGuard® multi-layer backsheet products offer long-life UV and moisture protection and ...

Solar EVA sheets play an important part in enhancing the durability and performance of solar panels. They enable the solar cells to "float" between the glass and the backsheet, helping to soften shocks ...

It is a manufacturer covering R & D, production and sales of various epoxy resin copper clad laminates, high precision insulation board, prepreg and other products which belong to electronic material industry.

Our Quentys(TM) polyolefin-based encapsulants offer several advantages over traditional ethylene-vinyl acetate-based encapsulants, including superior UV and moisture resistance, the ability to withstand ...

For connectors in solar-power generators, Asahi Kasei recommends the PV40Z grade of our XYRON(TM) modified PPE resins. This material offers a good balance of tracking resistance and cold-impact ...

The potting materials formulated at Epic Resins have a wide range of characteristics to address the specific needs of solar power electronics. In addition to our polyurethane and epoxy potting ...

Our adhesives can be used not only for assembly of photovoltaic panels but also for attaching the panel frames to the mounting racks. Epic S7469 is a two-component urethane adhesive designed to ...

Photovoltaic plant resin board
