

Explore CAP-XX's ultra-thin, high-performance supercapacitors designed for efficient and reliable energy storage in advanced technologies.

Os supercapacitores s#227;o usados em aplica#231;ões que exigem muitos ciclos r#225;pidos de carga/descarga, em vez de armazenamento de energia a longo prazo.

A Portuguese SME has developed an energy system combining a supercapacitor and Li-ion battery to replace lead-acid batteries in heavy commercial vehicles. This plug-and-play solution ...

This LIC (Lithium Ion Capacitor) is a super capacitor rated at 3.8V and 100 Farads. It combines the high power density of a capacitor with the energy storage of a battery, making it perfect for projects ...

OverviewComparison to other technologiesHistoryConceptPropertiesApplicationsBatteries, EDLC and LICs each have different strengths and weaknesses, making them useful for different categories of applications. Energy storage devices are characterized by three main criteria: power density (in W/kg), energy density (in W?h/kg) and cycle life (no. of charge cycles). LIC"s have higher power densities than batteries, and are safer than lithium-ion batteries

Enables fast charge/discharge at high current. High energy density for compact light weight equipment. Higher operating voltage. Extremely low leakage.

Lithium-ion capacitors offer superior performance in cold environments compared to traditional lithium-ion batteries. As demonstrated in recent studies, LiCs can maintain approximately 50% of their ...

Um supercapacitor ou supercondensador é um tipo de capacitor capaz de armazenar e fornecer uma elevada densidade de pot#234;ncia em um curto intervalo de tempo, apresenta capacit#226;ncia elevada se comparada com outros tipos de capacitores e ocupa o intervalo de aplica#231;ões entre capacitores eletrol#237;ticos e baterias. Eles tipicamente armazenam de 10 a 100 vezes mais energia por unidade de volume ou m...

Available in standard voltages such as 12V, 24V, 36V, and 48V, our ultracaps are designed to complement lithium-ion or lead-acid batteries. They support high-demand systems like steer-by-wire, ...
