

Discover how South Tarawa's rural communities are adopting rooftop photovoltaic panels paired with Battery Energy Storage Systems (BESS) to overcome energy poverty.

This study investigated three scenarios based on the existing microgrid's characteristics: conventional standalone diesel generators, PV/diesel without battery storage and PV/diesel with a battery storage ...

On September 6, 2022, Sino Soar Hybrid (Beijing) Technology Co., Ltd. received the bid award notification from the Kiribati Public Utilities Authority (PUB) and successfully won the bid for the ...

To address severe vulnerability to climate change impacts and extreme weather events, the project will also incorporate climate-resilient designs to address the project's and South Tarawa's exposure to ...

This paper presents the feasibility of greater renewable energy penetration in Tarawa, Kiribati, using green hydrogen. Using the load profile for South Tarawa,

The photovoltaic systems account for 22% of installed capacity but supply only around 9% of demand on South Tarawa; diesel generation supplies the remaining 91%. The PUB serves more than 57,000 ...

In this paper, a review of recent developments in rural electrification through micro-grids is presented. This work first lays the background on the challenges hindering the mass deployment of ...

Two landmark projects are rewriting Kiribati's energy narrative through solar-storage hybrids. Let's examine these game-changers. 1. South Tarawa Solar-Storage Powerhouse. In April 2024, ...

This is a critical natural asset for South Tarawa and the project will help to reduce the decline in water availability and water quality as well as avoid the risk of further encroachment of incompatible land ...
