

# Simple rooftop photovoltaic bracket installation

How do I install rigid solar panels on my roof?

EcoFlow's rigid solar panels come with a EcoFlow Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

What is solar panel roof mounting?

Solar panel roof mounting is the process of securely attaching photovoltaic panels to your home's roof structure using specialized mounting systems. This critical installation step determines both the safety and performance of your solar energy system for decades to come.

Can solar panels be mounted on a roof?

Mounting solar panels on a roof surface to create a solar power system is known as rooftop solar mounting. Solar panels can't be put on a roof without first having mounting brackets installed.

How do you install roof brackets?

The mounting hardware is used to attach the brackets to the roof structure. Make sure to use the proper type of hardware with a simple design for the roof material and follow the manufacturer's instructions for installation. Once the mounting hardware is in place, the panels can be secured.
