

Solar panels from various companies have similar prices

How do I buy the best solar panels?

To buy the best solar panels, be sure to compare prices, warranties, and efficiencies of different solar panel manufacturers. Here are the top 20 brands for 2025.

How much do solar panels cost?

If you just need a few panels for a small do-it-yourself project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). These prices don't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

Who makes the best solar panels?

Currently, SunPower, LG, REC, and Panasonic make the best solar panels due to their high efficiencies, competitive pricing, and 25-year warranty. If you're looking for more detail, read our article that compares the top brands and solar panel products.

Are all solar panels the same?

Most solar panel manufacturers produce photovoltaic (PV) panels for residential use, but the options aren't all created equal. Each brand has a different efficiency level, rate of degradation, durability and more, so choosing the best option for your solar project can be quite confusing.
