

Solar photovoltaic power generation index file

On this basis, we develop a global PV power plant mapping framework, generating global PV mapping product at 10 m resolution from 2019 to 2025. This geospatial dataset represents the ...

Compared to existing datasets, it provides better precision and spatial detail, showing global PV growth of over 60% between 2019 and 2022, with developing countries leading the increase.

This dataset identifies counties and municipalities that had a solar energy ban or moratorium as of April 2022. A TIF data file and a PNG map of the data are...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and Statistics web pages.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The Solar Power Generation Data dataset provides synchronized inverter-level AC/DC power and yield measurements together with plant-level weather sensor observations from two grid ...

Examines the viability of three solar technologies in the United States at the state and federal levels. Collaborative effort between government, industry, and the public to compile a ...

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. View an interactive map or download ...

Inside, you'll see a central table listing each grid's available photovoltaic (PV) datasets. Each grid has its own Markdown file containing detailed information on data sources, data types, and access/usage ...
