Thermoelectric Generator 100% Efficient More Reliable Than Solar Panels Less Energy Storage Cheaper to Install, Easier to Recycle Cooling The Modules Thermoelectric Stoves with Heat Sinks Thermoelectric Stoves with Fans Thermoelectric Stoves with Water Tanks Thermoelectric Stoves with Pumps Most thermoelectric stoves that have been built to date use electric fans to cool the module, in combination with a much smaller heat sink. Although the fan can break and is a parasitic load on the system, it can simultaneously increase the efficiency of the stove by blowing hot air into the combustion chamber -- slashing firewood consumption and ai...
