

# Solar shower head with bracket

How big is a solar shower head?

Shower-head has a large diameter of 5.9" which gives you perfect, regular and pressurized water flow. It's perfect for rinsing off before and after swimming, rinsing off the salted water at the beach and taking a soothing outdoor shower after a hectic day. It's highly recommended solar shower by customers.

How does a solar-powered outdoor shower work?

This freestanding outdoor shower is solar-powered, and allows you to take a refreshing shower in the warm weather, or by your pool before or after swimming. It connects to your garden hose for supply of cold water, and absorbs solar energy to warm the water in the tank. The temperature of the water can be heated up to 140°F.

How to install a solar shower?

The installation of a solar shower in the garden or around the pool is very simple and allows you to enjoy free warm water quickly. Solar showers heat the water thanks to solar energy and do not consume electricity. They are installed in the garden, on the terrace, or near the pool and they only need to be connected to a hose with access to water.
