

The current situation and prospects of photovoltaic panel industry

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

The industry is still assessing the full impacts of these federal actions. To benchmark the possible outcomes for the solar industry, this edition of SMI includes a base case and a low case ...

In our US solar market insight Q2 2025 report, created in collaboration with the Solar Energy Industries Association (SEIA), we dive into the federal policy headwinds and trade-action ...

Abstract The photovoltaic (PV) industry, a pivotal component of the renewable energy sector, is experiencing an unprecedented phase of growth and innovation. As a response to the ...

As we've seen in recent years, current global market forecasting will depend largely on getting China's solar deployment right due to its outstanding position in the global PV landscape.

o Despite representing only 21% of installed U.S. PV capacity at the end of 2024, 97% of PV systems--more than 5.3 million systems--were residential applications.

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global ...

The solar industry is facing a challenging landscape as it heads into 2025, driven by a mix of political uncertainties, potential tariff changes, and the ongoing effects of supply chain disruptions.

Amid a backdrop of massive installations and evolving metrics, IEA-PVPS 2024 "Trends Report" encapsulates significant shifts in photovoltaic deployment across the globe, reflecting PV's ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs ...
