

The first sodium-ion energy storage power station

China's first large-scale sodium-ion battery energy storage station officially commenced operations on Saturday. The station will help improve peak energy management and foster...

The first phase of the world's largest sodium-ion battery energy storage system (BESS), in China, has come online.

China has launched its first large-scale sodium-ion battery energy storage station, potentially reducing reliance on lithium-based batteries.

The world's largest energy storage facility using next-generation sodium-ion batteries has begun operations in China. The 100,000 kWh project in the Hubei province is capable of storing...

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world.

July 12, 2024: The first phase of China's state-owned Datang Group's new energy storage power station has been connected to the grid in Qianjiang, Hubei Province, making it the world's largest operating ...

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central China's Hubei province on June 30, the ...

China has officially introduced the world's first grid-forming Sodium-ion Battery energy storage facility. Located in Yunnan province, the Baochi Energy Storage Station is a national pilot ...

Bluetti, a Chinese manufacturer of energy storage and portable power systems, has unveiled what it calls "the world's first sodium-ion portable power station". Announced at IFA 2025 in ...

China has officially launched the world's first grid-forming Sodium-ion Battery energy storage facility. The Baochi Energy Storage Station, located in Yunnan province, comes as a national ...
