

The vatican s first power supply side energy storage

VATICAN CITY - Pope Francis has ordered the Vatican to install a solar plant that will provide electricity to the entire city state, as the pontiff does his bit to tackle climate change.

Pope Francis has ordered the construction of a solar power plant to supply the Vatican's electricity needs. He did so with the apostolic letter in the form of Motu proprio Fratello Sole,...

A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

Welcome to Vatican power storage ambitions - where ancient walls meet cutting-edge renewable tech. With just 825 residents, you might wonder why this microstate's energy projects make ...

On May 29, 2025, the Vatican City officially transitioned to solar power, marking a significant shift in the European energy landscape. The heart of this change is located at Santa Maria ...

VATICAN CITY (CNS) -- Pope Francis appointed two special commissioners to start work on building an agrivoltaic system on a Vatican property outside of Rome that could supply the whole of Vatican City's ...

The agrivoltaic plant, capable of supporting the entire energy needs of the Vatican, will be developed over much of the more than 400 hectares of territory.

Pope Francis has renewables on his mind as he says he wants Vatican City to run on solar power. To achieve his aim, solar panels will be installed on a Vatican-owned property outside ...

It asks the Church, and the world, to imagine a future where the power that lights the Vatican's basilicas comes not from fossil fuels, but from the sun that shines on its fields.

The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.
