

UK power storage cabinet 1200mm deep

What is a 12U rack & data cabinet?

The 12U racks and data cabinets range from Server Room Environments covers standard rack mount IT applications for use in office, retail and warehouse environments to cabinets designed for extreme conditions and roadside enclosure protection.

How deep should a 1000mm cabinet be?

A 1000mm deep cabinet may have a max internal depth of 870mm. The internal depth you need should also take into account cable radius bend. Rack Width: decide if you need a 600mm or 800mm wide rack. 600mm is the standard for a 19inch server rack. 800mm provide extra width for cable management and air flow.

How do I choose a 12U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 12U rack or cabinet can house equipment whose total height when placed into the rack is no more than 0.53m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.

How tall should a 12U rack be?

A 12U rack or cabinet can house equipment whose total height when placed into the rack is no more than 0.53m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device. For reference 1U=1.75inches or 44.45mm.
