

Vatican wind solar storage and transmission integration

In a quiet corner of the Roman countryside, an ambitious project is taking shape--one that seeks not only to power the Vatican City entirely through renewable energy, but also to embody the...

The "green" revolution initiated by Francis and accelerated by Leo XIV will make the Vatican the world's first zero-emissions state within a year. During a visit to Ponte Galeria three weeks ago, Leo XIV ...

This is pretty interesting as the Vatican joins a growing list of countries using 100% renewable energy. Perhaps even more intriguing is the way the Vatican did it - they used agrivoltaics.

Highlighting the need "to make a transition to a sustainable development model that reduces greenhouse gas emissions into the atmosphere, setting the goal of climate neutrality," Pope ...

Italy agreed Thursday to a Vatican plan to turn a 430-hectare field north of Rome, once the source of controversy between the two, into a vast solar farm. The Holy See hopes it will generate...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

In line with the principles of the encyclical *Laudato Si'* and a United Nations agreement on climate change, Pope Francis is making the Vatican "greener";

We are an international project developer of wind, solar and battery storage (BESS) projects. Our activities include the planning, development and construction of these projects, as well as their ...

The world's smallest country just made a big move: Vatican City is now powered entirely by solar energy, setting an example for global climate action.
