

Visit to Microgrid Laboratory

Welcome, and thanks for your interest. Please visit the MSL website here.

In 2022, Cummins proudly celebrated the opening of a new microgrid laboratory, the Power Integration Center (PIC) at their campus in Fridley, MN. The PIC is one of the largest and ...

We welcome inquiries from interested parties and prospective collaborators, member organizations, and sponsors. MSL is a 501 (c) (3) non-profit; donations are tax-deductible and can be made here.

The lab houses solar PV systems, battery energy storage systems, controllable loads, and measurement devices that can be used in cutting-edge research and development.more

Explore the Cummins Power Integration Center (PIC) today with our virtual tours. Choose a tour below to learn about each section of this state-of-art facility. The PIC lab integrates and tests microgrid ...

The smart microgrid lab provides tools for hands-on experience and research on smart microgrids. The laboratory is a smart microgrid on its own containing a renewable energy source, energy storage, ...

Microgrid enthusiasts who'd like to see the lab's unique capabilities in action have a number of options, including a classic site visit and walk through the lab.

The Microgrid Systems Laboratory (MSL) is a fully-integrated innovation center for decentralized energy systems.

The Microgrid Systems Lab can provide a rich range of training, testing, and experimental facilities for in-house projects and other users, including those to be developed at its headquarters site in Santa Fe, ...

We offer tailored analysis through our consulting and advisory services, providing support throughout the planning, design, deployment, and operations phases. Microgrids are capital-intensive and come in ...
