

Wacker Group Solar Cells

Wacker is one of the world's leading producers of polysilicon, with its newest facility in Charleston, TN. The array will produce more than 384,520 kWh of renewable energy annually, ...

Explore how Wacker Chemie drives innovation in material science for solar and semiconductor industries, shaping a sustainable future.

WACKER's hyperpure silicon for the production of solar cells as well as its pyrogenic silica and innovative silicone products for solar, wind and hydro power applications offer the renewable energy ...

Polysilicon is at the heart of every solar cell and the basis for every semiconductor chip. We are the only globally relevant producer of polysilicon in Europe and the largest manufacturer ...

WACKER develops a new cost-efficient process for multicrystalline solar wafers. The technology is introduced on the market and WACKER focuses on expanding its capacity for hyperpure polysilicon.

Discover the fascinating connection between Wacker Polysilicon, a solar panel material manufacturer, and America's newest nuclear reactor at Watts Bar, Tennessee. Explore how solar ...

(WACKER) stands out as a beacon of strategic resilience. The German chemical giant, renowned as the global leader in hyperpure semiconductor-grade polysilicon, has deftly pivoted to ...

German chemical company Wacker Chemie on Wednesday reported a 26% fall in its first-quarter core profit, missing analysts' expectations, due to reduced volumes of solar-grade ...

Business Model of the Group WACKER is a global company with state-of-the-art specialty chemical products found in countless everyday items, with applications ranging from tile adhesives to solar cells.

As a leading manufacturer of polysilicon and a pioneer in silicones, WACKER has been an important partner of the solar industry since its beginning. Today the company offers the solar industry a ...
