

What are the rebate programs for installing photovoltaic panels

Do solar rebates work?

Several states offer rebate programs that cover some or all of the cost of purchasing a home solar system and/or battery storage. These rebates can work in addition with the federal tax credit to increase the savings of going solar. For example: Maryland offers a \$1,000 rebate for solar photovoltaic and solar shingle installations above 1 kW.

Does Philadelphia have a solar rebate program?

The city of Philadelphia created a solar rebate program in 2019 that offered rebates of \$0.20 per watt for residential projects. However, this program was suspended due to budget cuts related to COVID-19. PBIs are incentives based on the energy production of a solar system.

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

How much does a solar rebate cost?

In some areas, solar rebates can provide over \$5,000. Rebates also sometimes come with requirements. You may only be able to select specific equipment, or there could be a maximum or minimum system size restriction. You might only be able to work with certain solar installers that the rebate program supports.

Learn all about the solar rebates and solar incentives available to shoppers to lower your costs.

Discover all available solar energy rebates and incentives in 2025. Learn about federal tax credits, state incentives, and local programs that can significantly reduce your solar installation costs.
