

# Which portable energy storage power supply is best in Norway

Why do you need a portable power station?

Why Trust Us? Portable power stations are handy for backup power during outages, off-grid electricity for an RV, or simply charging your laptop and phone while working remotely. They're effectively large bundles of rechargeable lithium-ion batteries, which provide a quiet, exhaust-free alternative to noisy gas-powered portable generators.

How much power does a portable power station need?

Small devices like a laptop and coolers tend to need around 60 to 100W of continuous power whereas appliances like fridges can need up to around 800W. So, a large portable power station with a higher output is best for powering large devices, or more devices at once.

How many MTU battery storage systems will Arva AS order?

Arva AS has ordered three mtuEnergyPack battery storage systems to maximize energy utilization at Senjahopen and Husøy. The battery package on Husøy, with a capacity of 2,718 MWh, will be Norway's largest battery of its kind. Being able to supply the entire community, including the fish farm, for approximately one hour.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.
