

Who should I blame if photovoltaic panels are not allowed to generate electricity

USA TODAY's analysis found 15% of counties nationwide now have some impediment to new utility-scale wind and solar energy. Gauging those impediments required researching a variety ...

This model has worked fairly well for more than 100 years, but it never anticipated that customers one day would be able to generate their own electricity with solar panels or small-scale...

Rooftop solar is key to fighting climate change, advocates say. But utilities disagree on how much they should pay for it.

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

The clock is ticking toward a deadline to meet renewable-energy standards. But USA TODAY's analysis finds local governments banning wind turbines, solar plants.

In many cases, HOA members may still need to request permission before installing their solar panels and ensure all electrical wiring is out of sight. Some states protect the rights of their ...

About 14% of California's total electricity comes from large-scale solar projects; another 10% of the state's power comes from rooftop residential solar. Solar companies and environmental ...

Local zoning ordinances are emerging as a nationwide barrier to siting and building renewable energy projects. Counties, cities, or towns in all 50 states have imposed restrictions on renewables at the ...

This is because utility providers have a finite amount of capacity on their electrical grids, and if too many people in a single area install solar panels, it can overload the grid and cause problems.
